Subject: RE: EPA/FWS next steps

Kim,

Please make any edits/additions from your perspective!

Next steps on topics that the field folks identified as priorities:

Triennial reviews for all states - work on a process for how the Service provides input into these.

- Tonya will coordinate with WQS Team to ensure EPA is reaching out to Field Offices in advance of triennial reviews.
- Montana's triennial review is about to start, so that will be a good test case to figure out a coordination process that works.
- Talking to Field Office about strategic plan development may help prioritize consultation work.
- We will take a pause on Regional level discussions to focus on making progress with Field Offices.

Colorado - Refinement of aquatic life protection WQS - especially Upper/Lower Colorado Basins and San Juan and Gunnison Basins.

- EPA will continue coordination with Laura

Montana - Site-specific criteria for selenium for Lake Koocanusa

- EPA will continue coordination with Joe/Karen

Tonya
